2016–2017

SUMMARY

AI-Native Product Manager with 3.5+ years building, shipping, and scaling digital and e-commerce products end to end. I find the real problem behind a request, write the spec, and build the working AI product — treating AI as a co-creation partner, not a text generator. Background in e-commerce, paid ads, and buyer psychology means I build for adoption, not just the demo. Shifted fully from direct sales to hands-on AI product development.

EXPERIENCE

Founder & AI-Native Product Builder

Oct 2025 – Present

M.C. Publishing · Remote

- Run a profitable solo digital-publishing business, orchestrating Claude across the full product lifecycle: market and niche-trend analysis, competitor-gap mapping, manuscript development, and high-converting Amazon A+ and listing assets.
- Built an Amazon Ads strategy assistant for bid, keyword, and ASIN decisions across the book portfolio — drove average CPC to ~\$0.50 and lifted organic sales via better listing indexing.
- Shipped a geo-aware cross-sell funnel (in-book QR → regional Amazon → email capture), hand-coded an institutional brand site on Cloudflare, and produced a full AI audiobook with YouTube SEO.

Founder & Product Manager

Mar 2023 – Present

Getman Store · Remote

- Owned end-to-end product, CRM, supply chain, and growth for a DTC brand; scaled to ~\$50k monthly revenue, \$8k+/mo ad spend, and 139k cross-platform followers.
- Solved the company's key-person dependency as a product: built an AI knowledge-base assistant (Claude → structured Markdown → deployed bot) for the full catalog and volatile supplier sizing; reaching error-free recommendations and onboarding a replacement.
- Built an internal tool converting raw CRM screenshots into structured, spreadsheet-ready data — cut manual entry ~90%.

Growth Marketing Specialist

Feb – Jul 2023

Blade Runners Team · Remote

- Ran market and audience research; via media-buyer interviews uncovered an overlooked regional positioning advantage in the Kazakhstan market and built a high-ROI ad framework around it.

Logistics & Operations Specialist

Aug 2020 – Feb 2023

Mell Trucking LLC · Remote

- Operated high-stress U.S. logistics ops; removed friction with early automation pipelines — multi-timezone sequencing, message templating, automated status logging.

SELECTED BUILDS

High Tech Stoic — anonymous-author literary non-fiction product built end to end with

Claude: brand site, A+ content, AI audiobook, 28-track soundtrack, YouTube SEO.

mcpublishing.co/hightechstoic

Personalized AI coaching system — context-engineered reflection partner; prototype for a per-team-member performance coach, rooted in 3 years of 1:1 team coaching.

Executive-function toolkit — fully AI-designed printable lead magnet (Gemini, Canva) for a neurodivergent audience that doubles as a cross-sell and review engine inside the book.
